

POLLY PRODUCTS

MADE IN USA
RECYCLED PRODUCT

GREEN PRODUCTS FOR A GREEN WORLD

Product Specifications

The term Green Products is not new to Polly Products; our products were touted as green before being green was popular. We start our molding process by purchasing 100% Post-Consumer Recycled Plastics, we then add colorant and UV stabilizers to protect the finished products from the damaging rays of the sun.

Milk jugs, detergent bottles and plastic grocery bags are manufactured from polyethylene (HDPE or #2 plastic). Although our country is getting better at recycling, over 70% of post-consumer plastic is currently buried in a landfill or burnt in an incinerator. We not only manufacture all of our recycled plastic components right here in Mid-Michigan, our craftsmen create and fabricate products that are shipped worldwide.

The products manufactured at Polly Products use post-consumer plastics and are made to last a lifetime. Each product manufactured is approximate 95% post-consumer plastic, with added UV protectants, colorant, and foaming agent being the only additional materials. For every pound our product weights, we use an approximate of 8 gallon milk jugs. For example, it takes 3,200 milk jugs to produce an 8 foot long picnic table that weighs about 400 pounds! Recycled plastic is not only environmentally friendly but it is weather resistant, does not splinter, rust, rot or decay. We use stainless steel, rust-free fasteners and our plastic planks require no painting or staining to redo each year, so the maintenance is minimal.
